(U) Transfer of SAINT, [redacted] and MIDAS Programs to the Department of the Air Force

References: Secretary of Defense Memorandum to the Chairman, Joint Chiefs of Staff, subject: 'Coordination of Satellite and Space Vehicle Operations', dated 10 September 1959.

1. In response to referenced memorandum and specific instructions of the Assistant Secretary of the Air Force (R&D), the DDR is requesting by separate memorandum the program responsibility for the SAINT, MIDAS and [redacted] programs be transferred to the DDR.

2. The programs will continue at the current fund level and in accordance with the approved development plans as amended by existing ARPA Orders.

3. It is of the utmost importance to the Air Force to request these program transfer actions immediately.

RECOMMENDATIONS:

4. That the Assistant Secretary of the Air Force (R&D) discuss [redacted] Defense Research and Engineering the [redacted] prior to signature.

5. Depending on the results of 4 above, that the attached memorandum [redacted] be signed.

DEC 3 1959

(U) Transfer of SAMOS, DISCOVERER, and MIDAS to the Department of the Air Force

Reference: Secretary of Defense Memorandum to the Chairman, Joint Chiefs of Staff, subject: "Coordination of Satellite and Space Vehicle Operations," dated 18 September 1959

1. In response to referenced Memorandum, the Department of the Air Force is requesting the program responsibility for the SAMOS, DISCOVERER, and MIDAS programs be transferred to the Department of the Air Force. The DISCOVERER program and three separate memorandums are submitted in accordance with telephone instructions from the Assistant Secretary of ~~Defense~~ AIR FORCE (R&D).

2. The programs will continue at the current fiscal level and in accordance with the approved development plans as amended by existing AFBM Guidance. It is proposed that the management be under the administrative procedures of the Air Force Ballistic Missile Committee with AFSDC as the Secretariat for Space Systems.

3. It is of the utmost importance to the Air Force to request these program transfer actions immediately.

RECOMMENDATION:

4. That the attached memorandums to Director, Defense Research and Engineering be signed.

SUBJECT: (U) Transfer of the SAINT Development Program to the Department of the Air Force

References: Secretary of Defense Memorandum, subject: "Organization of Satellite and Space Vehicle Operations", dated 18 September 1959

In response to the referenced memorandum, the immediate transfer of responsibility for the development of an Inbound Reconnaissance Satellite (SAINT) to the Department of the Air Force is requested. The development of this system can be expected to continue within the framework of the currently approved concept as indicated below. Detailed plans, to include some relationships with the United and Specified Commands, will follow. Recommendations concerning the transfer of funds between ARPA and the AF will be contained in a separate memorandum to OSD Comptroller.

The SAINT development program will result in an operational system for reconnaissance of all areas of the world through the use of both photographic and format sensors. ARPA satellites, with either of the above payloads, will be launched by ATLAS boosters into polar orbits to an altitude of 300 nautical miles above the earth. The reconnaissance information obtained will be either physically recovered from orbit near Hawaii or transmitted to ground readout stations.

The last approved development plan for SAINT, dated 30 January 1959, is presently being revised in accordance with a ground rule [redacted] which takes into account the FY '60 funds available for this program. Funding for the next two years is shown as follows:

[redacted]

	FY 1960	
[redacted]		
Included in Financial Plan	140.0	11.5

[redacted]

~~SECRET~~

Items, NSP, subjs: (U) Transfer of Atomic Development Program to the AEC (Cont'd)

NSP

FY 1952

NSP

Included in Financial Plan 15.7

The development plan, as revised to reflect the FY 1952 funds available, will be entered exhibit for the Summit and photographic rendered planes of the program, while allowing some slippage in the nonessential projected program. The initial launch of a recoverable payload will probably not occur before early FY '52.

It is anticipated that the transfer will result in no significant changes in this development program. Immediate transfer pending receipt of the latest development plan would permit orderly progression for the remainder of the fiscal year.

SUBJECT: (U) Transfer of MIDAS Program to the Department of the Air Force

Reference: Secretary of Defense Memorandum, subject: "Coordination of Ballistic and Space Vehicle Operations", dated 18 September 1959

In response to the referenced memorandum, it is requested that the responsibility for the MIDAS development program be transferred immediately from the Advanced Research Projects Agency, OSD to the Department of the Air Force.

The Air Force considers the MIDAS program as a promising means of establishing a system for the purpose of detecting the ballistic missile launching of ballistic missiles and enhancing the capability of both active and passive defenses. The system development program will continue at the approved fund level for FY '60 and in accordance with the approved development plans as established by existing ARPA Orders. Upon transfer of program responsibility, funds, and documentation, the AF will make a detailed survey of the status of the MIDAS program and submit for approval a revised development plan that incorporates existing ARPA Orders, the current development plan, and any necessary changes that become apparent as a result of the detailed survey. Detailed plans, to include your relationships with the Unified and Specified Commands, will follow.

The current development launch schedule within the fund and presently limitations are:

Flight	Booster	Payload	Scheduled Launch Date
#1	Mod 1A	ARM	January 1960
#2	Mod 1A	ARM	March 1960

*Approximately 3 to 7 weeks slip due to reschedule of ATLAS-MIDAS 4 launch.

3	1	ARM	December 1960
4	1	ARM	March 1961
5	1	ARM	June 1961
6	1	ARM	October 1961

AFDAE/Maj Flagg/kw/72798/25 Oct 59

MEMORANDUM FOR DIRECTOR, DEFENSE RESEARCH AND ENGINEERING, OSD

SUBJECT: (U) Transfer of the DYNOSOAR Development Program to the Department of the Air Force

Reference: Secretary of Defense Memorandum, subject: Coordination of Satellite and Space Vehicle Operations , dated 25 September 1959

In response to the above memorandum, the Department of the Air Force requests the immediate transfer of the DYNOSOAR program to the Air Force. While it is recognized that the referenced memorandum does not specifically identify the DYNOSOAR program, the assignment of responsibility for this program to the AF appears to be a logical and minimum extension of the SAMOS, MIDAS, booster and systems integration assignments which have been approved.

The DYNOSOAR development program is designed to study the problems related to the achievement of satellited orbits, altitude stabilization, operational system techniques, recovery of hypersonic vehicles and the execution of maneuverable aerospace engineering tests. Development will continue at the approved fund level for FY '60 and in accordance with the approved development plan dated 30 January 1959 as modified by existing ARPA Orders. Upon transfer of program responsibility, funds, and documentation, the AF will make a detailed survey of the status of the DYNOSOAR program and submit a revised development plan that incorporates existing ARPA Orders, a current development plan, and any necessary changes that become apparent as a result of the detailed survey.

The current schedule for the DYNOSOAR program is as follows:

1959										1960							
J	F	M	A	M	J	J	A	S	O	N	D	J	F	M	A	M	J	J	A
1	1		1		2		2	2	2		2	1	1	1	1	2	2	2	2

The total DYNOSOAR test flight program now consists of 25 combinations of TITAN and ATLAS vehicles. Because of difficulties in the DYNOSOAR F and VI flights, two months have elapsed since the last launch. During
